Task 3: project requirement:

A) Features and facilities:

- **Registration page:**
When the user enters our website, we will give him two options: one is registration and the other is login. If he is already registered, he just clicks on the login and can enter our website. If he is not logged in, he has to make his account on the sign-in option and then he can enter the website.
- **Home page:** wicket wiz includes the home page where there are many options, and you can select any option where you are interested.
- **Search bar:** There will be a search bar. He can search anything and get any details further.
- **Social media links:** There are some links of some players' profiles and of some other websites related to cricket.

- **Familiar/simple design:** The design will be very familiar to user and any one can easily use that website.

B) Technical constraints and consideration:

- **Speed:** We will use less resolution photo or videos on our websites so that website should not affect speed of mobile and should not hang the mobile.
- **Compatibility:** We are not preparing our website for a certain type of mobile but it will be available on all the mobile and devices.
- **Cost:** we are not using any paid membership in any case so our website will be budget friendly.

Task 4: user story:

Meet Sam. Sam loves cricket and always wants to stay updated on the latest cricket news and scores. One day, he visits a cricket website on his computer. He easily finds the homepage, where there are big buttons for live scores, news, and team updates. Sam clicks on "live scores" and sees real-time updates on ongoing matches.

Excited about his favorite team's upcoming match, Sam navigates to the "team updates" section. There, he finds interesting stories about his favorite players and their recent achievements. The website is simple to use, with clear menus and pictures that help Sam quickly find what he's looking for.

Happy with his experience, Sam decides to bookmark the cricket website, making it his go-to place for all things cricket. The website keeps him connected to the cricket world, making his passion for the sport even more reliable.
