ICT project

Software Familiar e development basics:

Task 3:_Project requirement:

A) Features and facilities:

- **Login page**: Our website includes the login page where you can login your account.
- **Home page**: Wicket wiz includes the home page where there are many options, and you can select any action that is present there.
- **Search bar**: There will be a main search bar where anyone can search any topic in which he is interested regarding cricket.
- **Social media links**: There are the links presents in that website of different players and other cricket websites.
- **Familiar/simple design**: The design of the website will be very familiar for everyone Thus; anyone can use that website very easily.

B) Technical constraints and considerations:

- **Speed**: we will use less resolution photo or videos on our websites so that its internet speed cannot be affected by the website.

- **Compatibility**: we will not prepare our website for a certain phone or system. It wil be available on all the platforms.
- **Cost**: we are not using paid membership in any case so the website will be budget friendly.

Task 4: User story:

The web site is good for all the users who are interested in cricket.

Let's say if a user wants to find the stats of the player so he can use the stats option for watching stats. And if someone wants to see the highlights of the match so he can use that option.
